

Onboarding Packages

Elation Health offers three onboarding packages to accommodate varying goals and budgets. Each includes a predefined scope and schedule of virtual workshops. The scope of each package is further defined in a [Statement of Work](#) but the table below should provide a general framework of the packages available to you.

| | Premier | Premier Plus | Premier Advanced | Custom ⁽¹⁾ |

| Typical Onboarding Duration | <45 days | <60 days | <75 days | |
| Optional Package Enhancements | | | | |
| Additional Data Imports | | \$500/Standard Import | | |
| Non-standard Data Import ⁽⁴⁾ | | Custom pricing | | |
| Custom Lab & PMS integrations ⁽⁵⁾ | | Custom pricing | | |

(1) Custom Onboarding: If your requirements or other preferences exceed the Advanced boundaries (i.e. more than 10 clinicians) or, are simply not addressed by one of these packages, we will scope a custom onboarding project.

(2) One instance or CDU is included; additional instances may require additional fees.

(3) Standard data is aligned with formatting and structural details that require minimal manipulation to ingest the data more efficiently & effectively. The amount in each package represents a full import of all applicable import types.

(4) Non-Standard data requires advanced manipulation to meet the required specifications to be imported; or to meet the customer's requirements for the migration. Elation's Data Services provides the designation of Standard or Non-Standard.

(5) Labs or PMS systems that Elation does not have an active integration with at this time.
